

Pfizer's commitment to genitourinary cancer medicine.

**Powered by experience.
Led by science. Driven
by patient care.**

With proven leadership in genitourinary (GU) cancer care, Pfizer is committed to transforming the treatment landscape for people with these pervasive and hard-to-treat cancers.

Our commitment extends to include programs and support for GU cancers.

Our portfolio includes **six approved medicines** to treat people living with prostate, kidney and bladder cancers in the United States.

.....

We are grounded in the **science of GU cancers** through clinical investments, collaborations and a robust pipeline and portfolio.

.....

We work closely with the **entire cancer community** to understand the needs of patients, families, and caregivers.
